Are there any other aspects of this course that you think were very positive (e.g. particular readings, assignments, projects, topics studied) and why?

Comments
The notes that the professor provided were incredibly helpful and detailed. If I ever felt confused or lost while doing homework, I went back to the notes to look at examples and thorough explanations.
object orientation was much more clear and understandable in this class than it's been in others.
Another thing I appreciated was their use of different teaching methods to accommodate different learning styles. Whether it was group work, individual assignments, or interactive discussions, they ensured that everyone had the opportunity to learn in a way that worked best for them.

Are there any other aspects of this course you would change in future offerings (e.g. particular readings, assignments, projects, topics studied) and how?

Comments
There's nothing that I would change in terms of the assignments. All the homework and labs seemed fair in relation to the topic we were learning.

no

What aspects of the instructor's teaching style did you find very positive and why?

Comments
The professor really explained things in great detail. I really like when he would go through coded examples step by step and clearly explain each segment of the code.
knowledge, enthusiasm, humor. detailed explanations that made sense. thorough but not rambling, concise but not rushed. helped to keep focus, and was perfect for note–taking
was always approachable and friendly, creating a welcoming and comfortable learning environment. They were genuinely invested in the success of their students and provided personalized feedback to help us improve.

What specific advice would you give to help your instructor improve your learning experience in this course, and why?

Comments
There's nothing in particular that I would advise. The only thing I would say is to possibly slow down the pace a little. Towards the end of the course, I felt that things were moving very quickly and the professor was trying to cover a lot of topics at once.
